

## Brownfield Implementation: Transitioning from Legacy Systems to MOSIP

**Format:** Presentation, Demo

**Date:** 13th March, 2025

**Duration:** 75 mins

**Target Audience:** Countries, System Integrators

**Targeted Expertise/Roles:** Developers, Technical/Solution Architects,  
Technical Managers, Product Managers

**Max. no. of Participants:** 25

**Pre-requisites:** Pre-registration for the workshop

**Presenters:** MOSIP team

### Objective:

This workshop will provide a comprehensive understanding of transitioning from legacy identity systems to MOSIP, covering key challenges, strategies, and best practices.

Participants will explore the assessment of existing systems, including data structures, storage, processes, and biometric quality, to identify migration needs. The session will outline migration strategies, including defining ID schema, data migration approaches, system integrations, and updates.

Additionally, a live demonstration of MOSIP's reference migration tool will highlight its capabilities, complemented by real-world case studies from countries that have adopted MOSIP, providing participants with valuable insights.

***Thank you, and we look forward to your participation in the session!***
