OpenG2P: Enabling efficient delivery of benefits

Format: Presentation
Date: 13th March, 2025
Duration: 80 mins (Incl. Q&A)
Target Audience: Countries
Max. no. of Participants: 30
Presenters: OpenG2P Team

Objective:

In this session, OpenG2P presenters will give a comprehensive overview of the platform, its use cases, and current deployments as well as the unique offerings of OpenG2P. It offers a set of open-source building blocks for a country's digital G2P delivery system. The session will give insight into the modules available for automating processes in the G2P delivery chain.

The presentation will discuss how we collaborate with and assist countries. We will delve into various use cases where OpenG2P's modules are being used to deliver crucial benefits and services to people. These real-world examples will demonstrate how the different platform components can be adapted to meet diverse country needs and illustrate our team's approach to country engagement.

OpenG2P is more than a technology provider. It is also invested in building local capacity among governments and the commercial ecosystem. This session gives an understanding of our capacity-building and ecosystem support services. The team will specifically highlight the OpenG2P Partner Programme and provide a glimpse into the OpenG2P Academy.

Target Audience:
Country representatives and System Integrators

Session Outcomes:
- Learn about OpenG2P offerings
- Use cases and deployment in countries
- Learn about the OpenG2P Partner Programme
- Introduction to OpenG2P Academy
