# What are your cloud options?

## On premises or local

Run your own servers on prem or at a local data warehouse.

## Region

Run your data and applications on the cloud in a Region.

Forgo a cloud connection, hosting your data and running your apps from a local server.

## Local Zone

Run your data and applications on the cloud in a Local Zone.

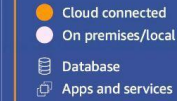

Host your data and run your apps from an AWS Region.

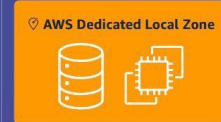

Get exclusive use of an AWS Local Zone for hosting and apps.

## Dedicated Local Zone

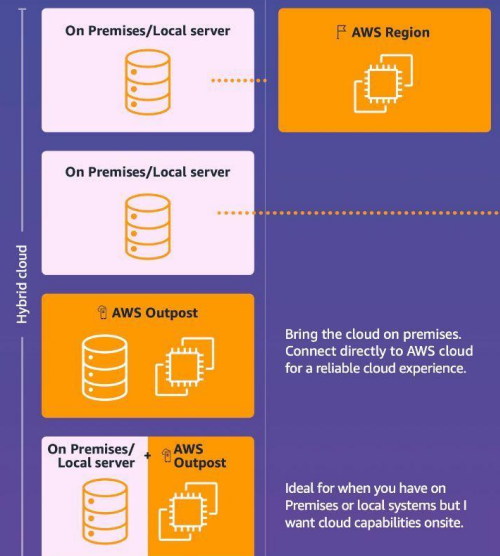

Like a Local Zone, but for your exclusive use.

Host your data and run your applications from an AWS Local Zone.

Get access to an AWS Local Zone without compromising your need for local data.

On Premises/Local server

AWS Region

On Premises/Local server

AWS Local Zone

AWS Outpost

Bring the cloud on premises. Connect directly to AWS cloud for a reliable cloud experience.

On Premises/Local server + AWS Outpost

Ideal for when you have on Premises or local systems but I want cloud capabilities onsite.
