

Customising MOSIP

Format: Presentation and Brainstorming

Date: 11th/12th February, 2026

Duration: 75 mins (Incl. Q&A)

Target Audience: Countries, SLs

Targeted Expertise/Roles: Software Development Technical Leads, Solution Architects, Technical Managers, Product Managers, Business Analysts, System Integrators

Max. no. of participants: 40

Pre-requisites: Pre-registration for the session, Review pre-read material

Presenters: MOSIP Team

Objective:

Every country has distinct identification requirements shaped by its infrastructure, legal environment, cultural context, and intended use cases. Recognising this diversity, MOSIP offers a highly flexible and configurable identity platform that enables countries to design systems tailored to their specific needs.

Building on the strong participation and positive response from last year, this knowledge-sharing session returns with enhanced content and topics. The session will demonstrate how MOSIP's adaptability empowers governments to implement robust, scalable, and country-specific digital identity systems.

Participants will gain an overview of identity creation and usage through the MOSIP platform, with a strong focus on ID schema design and customisation. The session will also highlight MOSIP's modular architecture, showcasing how it supports customisation across the identity lifecycle, from user interface specifications and schema fields to registration workflows, processing logic, and system integrations.

By repeating and expanding this session, we aim to deepen understanding, share new insights, and continue supporting countries in leveraging MOSIP to meet their evolving identity management requirements.

Pre-Read Links for Participants:

In order to facilitate active participation and valuable understanding during the session, participants are encouraged to review the following links to familiarise themselves with MOSIP.

- **Overview of MOSIP and its Core Features:** A high-level introduction to MOSIP, explaining its mission, key functionalities, and the benefits it offers. Click [here](#) to learn more.
- **ID Lifecycle Management:** A detailed explanation of the various stages an identity record goes through within MOSIP, from initial registration to eventual deactivation or archival. Click [here](#) to learn more.
- **Understanding ID Schema:** A technical deep dive into the structure and format of the identity data stored and managed by MOSIP, including the different data fields and their definitions. Click [here](#) to learn more.
- **Registration Client UI Specifications:** Documentation outlining the user interface and functionality of the registration client application, used by operators to enroll individuals in MOSIP. Click [here](#) to learn more.
- **Pre-registration UI Specifications:** Specifications for the user interface of the pre-registration module, which allows applicants to begin the enrollment process online before visiting a registration center. Click [here](#) to learn more.
- **Master Data Guide:** A guide explaining the management of master data within MOSIP, which includes reference data like location codes, demographic information, and other essential parameters used by the system. Click [here](#) to learn more.
- **Partners:** Information about the MOSIP partner ecosystem, detailing how organisations can integrate with MOSIP. Click [here](#) to learn more.

Thank you. We look forward to your participation in the session!
