

## Business Wallets: Extending DPI from People to Enterprises

**Format:** Presentation and Brainstorming

**Date:** 11th / 12th February, 2026

**Duration:** 60 mins (Incl. Q&A)

**Target Audience:** Government, DPI adopters, Financial institutions, Ecosystem partners, and Wallet providers

**Max. no. of Participants:** 40

**Presenters:** Harmen van der Kooij (FIDES Labs), Other Partners

### Objective:

To equip participants with a **clear understanding of Business Wallets** as a key enabler for **enterprise identity, compliance, and service delivery**, and to collaboratively explore **practical design patterns, use cases, governance models, and interoperability approaches** for implementing business wallets within Digital Public Infrastructure (DPI) ecosystems.

The session will focus on how **business entities (SMEs, enterprises, micro-businesses)** can securely **hold, receive, and present verifiable credentials**, and how Business Wallets can support **regulatory reporting, supply chain transparency, trade, sustainability, and financial inclusion**. Participants will engage in **hands-on brainstorming** to shape real-world adoption models tailored to country and ecosystem needs.

### Target Audience:

- Government ministries (Digital Transformation, Commerce, Industry, MSME, Finance)
- DPI architects, policymakers, and regulators
- Wallet providers and identity solution builders
- Financial institutions and fintech partners
- Technical implementing partners and system integrators
- Development organisations and ecosystem collaborators

## Pre-read Material:

- <https://newsletter.identosphere.net/i/183704059/business-wallets>
- <https://fides.community/community-tools/organizational-wallets/>

## Session Outcomes:

Participants will:

- Gain a **practical understanding of Business Wallets** and their role in **enterprise-focused DPI**
- Learn **real-world use cases** for business credentials (compliance, trade, supply chain, sustainability)
- Understand **design and governance considerations** for Business Wallet ecosystems
- Explore **interoperability models** between business wallets, relying parties, and regulators
- Co-create **implementation ideas, pilots, or country-specific adoption pathways**
- Leave with a **shared framework and actionable insights** for deploying Business Wallet

*Thank you, and we look forward to your participation in the session!*
