

## DPGs4DPI - Building Cross DPG Use Cases

**Format:** Presentation and Brainstorming

**Date:** 11th / 12th February, 2026

**Duration:** 60 mins (Incl. Q&A)

**Target Audience:** DPG Product Owners, Implementors, Adopters, or just Interested participants

**Max. no. of Participants:** 40

**Presenters:** MIFOS

### Objective:

To equip participants with a set of example use-case workflows mapped to cross-DPG solutions, demonstrating how DPGs working together can solve problems. The workshop will also give the tools to do this analysis in the future. This is designed to be a highly interactive workshop, and we hope to get support from a wide range of DPG product owners attending to make this a valuable session, whether you work in a DPG, are an implementor, an adopter, or just want to explore more the capabilities of DPGs and how they can work together rather than be siloed solutions.

The workshop will start with a rapid elevator pitch overview of the DPGs present, along with how we will operate. Together, we will identify some real-world end-to-end challenges and use cases. We will then work in groups to map DPGs against these, identifying any gaps that need to be addressed. The session will end with a cross-group discussion and presentation of the mappings.

### Target Audience:

- DPG Product Owners, Implementors, Adopters, or anyone interested

### Pre-read Material:

- Not essential as we will provide overviews of the DPGs on the day. However, if you have a real-world challenge, use-case, or workflow you need to find solutions to, please bring that to the workshop

### Session Outcomes:

- A set of exemplar use cases/flows mapped across DPGs that can be used by implementors/adopters or DPGs to build value propositions together.

***Thank you, and we look forward to your participation in the session!***
